Textbooks: UNIVERSITY PHYSICS Volume 2 & 3 (Chaps. 35-44),  
15th Edition, by Young and Freedman, Pearson

Course Website: https://laulima.hawaii.edu

Learning Outcomes
On completion successful students will be able to:

a) Demonstrate mastery of problem solving skills in general  
b) Mastering interference and diffraction concepts  
c) Understand the basic principles of modern physics: Einstein theory of Relativity,  
   Quantum theory of light, Particle nature of matter, Quantum mechanics in one  
   dimension, basics of Solid State Physics, Nuclear and Particle Physics and their  
   applications.  
d) Develop a comprehension of the current basis of broad knowledge in Modern physics.

NOTES:  
The course week starts with the Tuesday lecture. (1:30 – 2:45 pm, Zoom).  
Zoom link: https://hawaii.zoom.us/j/9343295160

Lectures will be held every Tuesday and Thursday.

Preparation prior to EACH course session:  
a) Read the relevant sections in the textbook.  
b) Review problems (by doing them by yourself independently) discussed in the  
   previous lecture session.  
c) Review examples in the textbook, for the material covered in previous lecture.

Homework:  
Homework will be assigned from the Mastering Physics website (required) for each  
chapter.  
Deadline extended under special circumstances, upon request.

QUIZZES: Students use ONLY iClickers for the in-class quizzes. These quizzes last approximately 15 minutes and consist of 3-6 multiple choice questions (A...E or A...D for most questions, and True/False for others) that can be answered in 2-3 minutes: either conceptual or simple calculation problems. Quizzes will take place at the beginning of lectures from time to time, to check the student preparation for the class.

In-class 2-minute problems are of a conceptual nature involving application of principles being discussed in each lecture. The questions are multiple choice, very similar to the quizzes.

The same grading scheme is used for 2-minute problems and for quizzes: 1 points for a correct answer; 0.25 point for an incorrect answer (for participation and effort).

MIDTERMS Two midterms will be given during the term. If you miss a midterm and have a documented, valid reason for doing so, please notify me by email as soon as possible. You should state in writing why you missed a midterm (the fill-out form is at the end of the syllabus) and email it to me. A single make-up midterm with material covering chapters 35 - 41 will be given toward the end of the term. In case that no form is received, a score of zero will automatically be assigned for the missed midterm.

**FINAL EXAM:** The final exam is comprehensive – it will be based on all the subject material covered in the course. However, the material covered during the second half of the term is given more emphasis.

**Grading:** The final course grade will be based on the following weights.

**Grade assignment guidelines:**

- A 90-100
- B 80 - 90
- C 70-80
- D 60-70
- F < 60

Minor adjustments to the grading scale are possible and will be applied as needed at the end of the term. Grades like A+, A-, B+, B-, C+, C-, D+, D- will also be assigned. The ranges for these grades will be determined at the end of the term, when the final grades are assigned, but no big changes are anticipated.
