PHYSICS 152 – COLLEGE PHYSICS II COURSE SYLLABUS
University of Hawaii at Manoa

Instructor: Shidong Kan, Ph.D.
Email: shidong@hawaii.edu
Office: TBA
Office Hour: Time and Zoom link will be announced in Laulima

Course Title: College Physics II

Required Materials

Textbook: Hugh D. Young, College Physics, 11th edition, Vol. 2 with Mastering Physics. This course uses IDAP for the textbook and masteringphysics.

Calculator: a scientific calculator with scientific notation, trig functions, exponents and logarithms – bring to exams and lectures (for occasional in-class questions). Graphing or programmable calculators are allowed, but are not necessary.

Course Description

PHYSICS 152 is the second course in a non-calculus based sequence of introductory physics. The topics covered include electricity, magnetism, optics, special relativity, and atomic & nuclear physics. The course requires mathematical tools of algebra, geometry, trigonometry and vectors.

Prerequisites

● A grade of “C” or better in PHYSICS 151
● Math 140 [“C” or better] or higher; or a passing score on the Math Assessment Exam.

Learning Objectives

Upon successfully completion of this course the student shall demonstrate mastery of and competence in the following areas through assignments, classroom discussions and formal evaluation:

● Electric Charge and Electric Field
● Electric Potential
● Ohm’s Law and Kirchhoff’s Rules
● Magnetic Field
● Electromagnetic Induction and Alternating current
● Electromagnetic waves
● Geometric Optics
● Interference and Diffraction
● Atoms, Molecules and Solids
Grading

The boundaries separating letter grades in the final distribution are chosen based on the standards I have established for the course and are not predetermined numerical values. The work submitted for evaluation will count towards the final grade based on the following:

Homework 20%
Exam I 20%
Exam II 20%
Exam III 20%
Exam IV 20%

Exams
All four exams are exclusively problem solving. You must take all exams to avoid a failing grade in the course. Due to time constraints, there will be no cumulative final exam.

Homework
Homework will usually be due on the following lecture day and will be graded automatically on the mastering physics website. Your scores will be reported to me automatically. Late homework will not be allowed without a legitimate, verifiable excuse. There will be homework almost every day, so don't pile them up.

Solving Physics Problems

- Pay attention to significant figures and units – all final numerical results must accompany proper units.
- Always check dimensions.
- Solve problems symbolically. If you “plug in” numbers at the beginning, the dimensional analysis will become impossible along the line.
- You will need a scientific calculator for homework and exams.
- On free-response exam problems, you must show your work. A correct final answer without steps is not acceptable and will result in no credit.
- Please do NOT use red ink on any exams. It is reserved for grading.

Exam and Homework Policy

- You must work on exams entirely on your own. No collaboration of any kind is allowed. Copying from the other students, even partially, will be given a score of zero. Cheating or plagiarism may be forwarded to the Office of Judicial Affairs for further disciplinary review.
- We encourage students to first attempt homework problems individually. You are allowed to study together, but it is unwise to let someone simply show you the solution.
- Ultimately all assignments must be completed by the final day of the semester to receive any credit at all. No assignments/exams will be accepted after the final day.

Laulima

All students enrolled in this course will have access to the additional information posted on the Laulima site for this course. You can access Laulima at http://myuh.hawaii.edu. You will need your UH username and password to log in. Please use the “Messages” tool in Laulima for course communication (not Email).
